

**Course:****Implementing and Maintaining Microsoft SQL Server 2008 Integration Services**

---

**Course Number:** MOC6235**Duration:** 3 days**Description**

This three-day instructor-led course teaches students how to implement an Integration Services solution in an organization. The course discusses how to develop, deploy, and manage Integration Services packages.

**Target Audience**

This course is intended for information technology (IT) professionals and developers who need to implement data transfer or extract, transform, and load (ETL) solutions by using Microsoft SQL Server 2008 Integration Services.

**Objectives**

After completing this course, students will be able to:

- Describe SQL Server Integration Services and its tools.
- Create an Integration Services package.
- Implement control flow in an Integration Services package.
- Implement data flow in an Integration Services package.
- Implement logging in an Integration Services package.
- Debug and implement error handling in an Integration Services package.
- Implement checkpoints and transactions in an Integration Services package.
- Deploy an Integration Services package.
- Manage and secure an Integration Services package.

**Prerequisites**

Before attending this course, students must have:

- Exposure to enterprise data import and export scenarios.
- Experience navigating the Microsoft Windows Server environment.
- Experience with Microsoft SQL Server, including:
  - SQL Server Agent.
  - SQL Server query language (SELECT, UPDATE, INSERT, and DELETE).
  - SQL Server System tables.
  - SQL Server accounts (users and permissions).

In addition, it is recommended, but not required, that students have completed:

- Course 6231: Maintaining a Microsoft SQL Server 2008 Database.
- Course 6232: Implementing a Microsoft SQL Server 2008 Database.

## Outline

### **Module 1: Introduction to SQL Server 2008 Integration Services**

The students will be introduced to the role that Integration Services plays in extracting, transforming, and loading data. The students will also be introduced to the tools that are used to build and manage Integration Services solutions.

- Lessons
  - Overview of SQL Server Integration Services
  - Using Integration Services Tools
- Lab : Introduction to SQL Server Integration Services
  - Using the Import and Export Wizard
  - Running an Integration Services Package
  - Import Data Using the Import and Export Wizard
  - Managing Packages

### **Module 2: Developing Integration Services Solutions**

The students will be introduced to the development tasks that are involved in creating an Integration Services package.

- Lessons
  - Creating an Integration Services Solution
  - Using Variables
  - Building and Running a Solution
- Lab : Developing Integration Services Solutions
  - Creating an Integration Services Project
  - Implementing a Package
  - Building and Running an Integration Services package

### **Module 3: Implementing Control Flow**

The students will be introduced to the tasks and precedence constraints that can be used to implement control flow in an Integration Services package.

- Lessons
  - Control Flow Tasks
  - Control Flow Precedent Constraints

- Control Flow Containers
- Lab : Implementing Control Flow
  - Creating a Simple Control Flow
  - Configuring Precedence Constraints
  - Using Containers

#### **Module 4: Implementing Data Flow**

The students will be introduced to the data flow sources, transformations, and destinations that can be used to implement a data flow task in an Integration Services control flow. It also explains how to use data flow paths to direct valid and invalid rows through the data flow.

- Lessons
  - Data Flow Sources and Destinations
  - Basic Data Flow Transformations
  - Advanced Data Flow Transformations
  - Data Flow Paths
- Lab : Implementing Data Flow
  - Transferring Data
  - Implementing Transformations
  - Using Data Viewers
  - Configuring Error Output

#### **Module 5: Implementing Logging**

The students will be introduced to how to use logging in an Integration Services package, and explained how to configure and use logging providers to generate information about a package's execution.

- Lessons
  - Overview of Integration Services Logging
  - Using Logging
- Lab : Implementing Logging
  - Configuring Logging
  - Implementing Custom Logging

#### **Module 6: Debugging and Error Handling**

The students will be introduced to how to debug Integration Services packages by using the debugging tools in Business Intelligence Development Studio. It then explains how to implement error-handling logic in an Integration Services package.

- Lessons
  - Debugging a Package

- Implementing Error Handling
- Lab : Debugging and Error Handling
  - Debugging a Package
  - Implementing Error Handling
  - Controlling Failure Behavior

### **Module 7: Implementing Checkpoints and Transactions**

The students will be introduced to what checkpoints are and how to implement them. It then discusses transactions, and describes how to implement transactional data access logic in an Integration Services package.

- Lessons
  - Implementing Checkpoints
  - Implementing Transactions
- Lab : Implementing Checkpoints and Transactions
  - Implementing Checkpoints in a Package
  - Implementing Transactions in a Package
  - Implementing a Native Transaction

### **Module 8: Configuring and Deploying Packages**

The students will be introduced to how to create Package Configurations and how to deploy Integration Services packages to production servers.

- Lessons
  - Package Configurations
  - Preparing and Deploying Packages
- Lab : Configuring and Deploying Packages
  - Creating a Package Configuration
  - Preparing a Package for Deployment
  - Deploying a Package

### **Module 9: Managing and Securing Packages**

The students will be introduced to the management tasks that relate to Integration Services packages and explained how to perform those tasks by using the Integration Services management tools. It also describes how to secure Integration Services packages.

- Lessons
  - Managing Packages
  - Securing Packages
- Lab : Managing and Securing Packages
  - Importing a Package
  - Configuring, Executing, and Monitoring a Package
  - Scheduling a Package
  - Securing a Package
